DRUG NAME: Lidocaine Nasal Spray

COMMON USES: Migraine headache.

HOW TO USE THIS MEDICINE:

1. Remove safety clip and cap from nasal applicator.
2. Prime the pump by pressing downward on the collar of pump and releasing. This needs to be done if pump is new or hasn't been used in a while. Repeat several times until a fine mist appears.
3. Spray is to be used in nostril of affected (headache) side only. If the headache is on the right side of the head, use spray in right nostril only. If the headache is bilateral (occurring on both sides of head), then use spray in both nostrils.
4. Blow nose to clear nostrils.
5. Tilt head back slightly while pressing down on nostril of unaffected side with finger. Insert nasal applicator into other nostril.
6. Press down on collar of pump while deeply breathing in through the nose. Repeat this process if physician indicates that more than one spray is to be used.
7. Replace safety clip and cap.

PRECAUTIONS: Do not use if there is a known allergy to Lidocaine or if you have a history of cardiac arrhythmia without first consulting physician. Follow physician's instructions carefully. Do not use more than prescribed.

POSSIBLE SIDE EFFECTS: Side effects that may occur during treatment are slight burning or numbness in nose, back of throat, or around eyes, a sense of gagging and unpleasant taste. Consult physician or pharmacist if side effects are severe, bothersome, or a rash develops.
