**DRUG NAME: Pyruvate 70% in TRIS Solution**

**COMMON USES:** This medication is used to treat warts.

**HOW TO USE THIS MEDICINE:** Follow the directions for using this medication provided by your physician. Store this medication at room temperature in a tightly-closed container. Wash the affected area or soak the affected area in warm water for 5 minutes. Dry the area thoroughly. Use the attached brush to apply this medicine to the wart. After the solution dries, apply a piece of waterproof tape over the wart.

**CAUTIONS:** Try not to get any of the medication on the skin surrounding the wart. For external use only. Do not use on irritated skin, or any area that is red or infected. If you are diabetic or have poor blood circulation, contact your physician. Do not use on moles, birthmarks, genital warts, or warts on the face or mucous membranes. If solution gets in the eyes, flush with water for 15 minutes. Avoid inhaling vapors. Keep this and all medications out of the reach of children. In case of accidental ingestion seek professional assistance or contact a Poison Control Center immediately. **HIGHLY FLAMMABLE.** Keep away from fire or flame.

**POSSIBLE SIDE EFFECTS:** Side effects that may occur during treatment include: Stinging, burning, and irritation. If you notice other effects not listed above, contact your physician, nurse, or pharmacist.
